Chennai.

ABOUT OUR COMPANY

We would like to introduce ourselves as one of the leading experts in the field of structural fabrication and erection, both conventional and ornamental. Promising pure quality and excellent service, the company was founded in 1996 by **Mr. T. Jerald** as **JM Engineering & Roofing technology**. Since then, the firm has always exceeded the expectations and reputations of our customers, workers, and vendors. Through teamwork and understanding, we are constantly striving for continuous improvement, active community involvement and fair trade and profits.

In 2021, we rebranded our business to **JM Roofs** and is now managed by **Mr. T. Jerald's** son, **Mr. J. Mervin William**, under his guidance. Our scope of work is mainly the design and fabrication of roof structures with roofing on a turnkey basis. We have an experienced team that provides excellent technical support on specifications, reliability, quality, as well as 2D designs and 3D models.

We use high quality and cost-effective materials, fittings and accessories for our designs with colour coated roofing sheets made using aluminium, zinc and steel - galvanized, galvalume and weathering steel (Corten). Thermal insulation using air bubble and rock wool or glass wool and acoustic insulation using acoustic foam can also be done if required. FBC, Calcium silicate boards, gypsum board, PUF panel etc. is used for interior/exterior cladding and false ceiling. Standard accessories and fasteners, variable roof trusses, columns and purlins fabricated using CR pipes, MS pipes and joists sourced from India's best steel manufacturers.

Over the years, we have successfully completed various projects in restaurants, warehouses, workshops, classrooms, carports, patios, private cabins and more for residential, commercial, institutional, industrial and assembly building spaces.
